

External Funding

Process for Eligible Postdoctoral Scholar Fellowship Trainees

The purpose of this form is to assist the institute in identifying if your current external award supports the cost of your benefits. In some cases, a Scholar's outside grant or fellowship may include funding or coverage for benefits. To the extent that a postdoctoral scholar's outside grant or fellowship does not provide funding that covers the Caltech contribution for health, vision and dental coverage, you may be eligible for a Caltech contribution. Your sponsoring faculty will be responsible for funding all or any of the Caltech contribution toward your eligible plans. Please complete this form.

External Funding Support for Benefits Cost

Please indicate below if your funding source provides supports towards the cost of benefits:

- Yes, my funding source provides support
- No, my funding source does not provide support

If yes, my external funding amount supports up to \$ (US).
